

"A Chemical Engineer in the International World of Petroleum / Petrochemicals:" *Jobs, Projects and a Career*

Mr. Babu Y. Rao, President – Transtech International, NY, has traveled in over sixty countries and worked in ten of them during his personal and professional life. Mr. Rao will discuss his experiences which range from employment with Texaco, Arabian American Oil Company (ARAMCO), PEMEX dealing with refinery operations, environmental studies, economic evaluation of various projects, research on process development, and pilot plant operations to the establishment of his own organization, "Transtech International," consulting upstream and downstream petroleum operations and transferring technology from developed countries to developing countries. Mr. Rao has also published several reports and technical papers and a number of patents related to petroleum / petrochemical processes, one which lead to unleaded gasoline.
