“Sustainability Trends in the Chemical Industry”

Scheduled Speaker:

**Darlene Schuster, PhD - Executive Director
 AICHe Institute for Sustainability**

Sustainability continues to be a major driving force for innovation in the chemical industry. It also plays a role in companies’ economic and social decision making. However, sustainability is difficult to quantify because there are so many ways to define it. The AICHe Sustainability Index® provides benchmarks of a company’s performance on a variety of metrics including those related to corporate social responsibility. This presentation will provide attendees with an overview of this useful metric.

Darlene Schuster is the Executive Director of the Institute for Sustainability, an AICHe Technological Community, where she oversees the industry, membership and youth-focused entities which advance the science and state of sustainability. She also directs the new AICHe Center for Energy Initiatives, Society for Biological Engineering, and the International Society for Water Solutions.

Dr. Schuster held the Clare Boothe Luce Chair of Chemical Engineering at Bucknell University, and held various engineering positions with Gulf Oil Production Research and Chevron Oil Field Research Company. She was an ACS Science Policy Fellow, received the Technical Achievement Award from the Central Pennsylvania Engineers Council in part for contributions to novel technology product development and commercialization by her company, DP Group. Dr. Schuster holds a BSChE (WVU), MSChE (University of Pittsburgh), and PhD. (West Virginia University).
