

Société de Chimie Industrielle

Mentee Program Application Form

(September 2017 version)

Société de Chimie Industrielle is a non-profit life sciences and chemicals industry association that was founded in 1916. Our website is www.societe.org. We maintain a mentorship program that matches members and friends of our organization with students who are studying chemistry, chemical engineering, and life science oriented topics either at the undergraduate or graduate level at a selection of universities. The concept is to provide students with mentors who can help them make career decisions.

We have a group of mentors who are available to speak with mentees assigned to them. The minimum commitment is to speak with the mentee by phone for or an hour to provide career advice. If the advice to the mentee extends to a series of calls or a face-to-face meeting, we welcome such a development.

We do ask both the mentors and mentees to keep us informed about how the mentoring session or sessions went and when the mentoring activity has been completed. When you are assigned to a mentor, we will provide you with the method we would like you to use to keep us informed.

Please fill out the form below and send it to Danielle Fraser, Administrator, Société de Chimie Industrielle at sdci1918@gmail.com. You can also call her at (212) 725-9539. Feel free to attach a resume if you wish. You will be assigned to a mentor by our mentor program staff when there appears to be a good match.

Name (First): _____

Name: (Middle): _____

Name (Last): _____

Surname: _____

School: _____

Address: _____

Email Address: _____

Direct Telephone Number: _____

Cell Phone Number: _____

Academic Program: _____

Brief description of your academic and working career history:

What industry segments are you interested in? (Type in X for those that apply)

Energy/Oil

Chemical

Environmental

Pharmaceuticals

Biotech – Life Sciences

Biotech - Industrial
