SOCIAL JUSTICE IN STEM

MEDICAL VIOLENCE: Gender and Race in Healthcare

Dr. Amber Benezra
Assistant Professor, Science and Technology Studies

Medical racism or racial discrimination in healthcare, is considered a public health emergency. Black women are particularly at risk: maternal health statistics are dismal, Black women are more likely than white women to die of cancer, stroke, and heart attack, and Black Americans are disproportionately dying of COVID. This dialogue will discuss the devastating consequences of racial and gender bias in healthcare, and the invisible threat of medical violence.

10/5 @ 4PM
