## BD Winter Externship Program

At BD, we are committed to recruiting bright, passionate emerging leaders to strengthen our innovative culture. As a global leader in the medical technology industry, BD provides young undergraduate students with the opportunity to be fully immersed in the life-changing work we do every day.

We do this through our one day Winter Externship Program, which provides young undergraduate students with an opportunity to gain hands-on knowledge and an insight into professional life.

### Externship participants are given the opportunity to:

- Shadow a BD employee and experience a day in their life
- Tour BD facilities to learn more about BD and the medical technology industry
- Interact with and gain the perspective of a senior BD executive
- Network with industry professionals
- Prepare for career development through interactive resume writing and interviewing skills workshop

**BD**

Helping all people  
live healthy lives

## Value Proposition:

As a participant in BD's Winter Externship Program, you will have the chance to experience what life is like after college and the ability to explore a wide array of opportunities available to you as a young professional. By interacting with both young and senior associates in various areas of the company, you will be able to expand your professional network and gain further insight into what you aspire to do. Finding a job after graduation that is interesting, challenging, and rewarding is no easy feat, but involvement in BD's Winter Externship Program is one step in the right direction.

### Externship Description:

BD's Winter Externship Program is designed to give college undergrads a glimpse of the professional opportunities available to them post-graduation. The externship is a one day program held during the students' Winter Break at BD's Corporate Headquarters in Franklin Lakes, New Jersey. The program will give them the opportunity to learn more about BD by touring the facilities, seeing the products we manufacture and interacting with various BD associates. The program also includes a presentation by a senior leader at BD. Additionally, you will be able to experience a "day in the life" to see what you can expect from a job just out of college during an afternoon shadowing session with a Leadership Development Program associate. You will also benefit from a professional development session where you can refine your resume writing and interviewing skills, as you look for future internship and full-time opportunities. The externship as a whole is a comprehensive way to learn of available post-graduation opportunities, all while networking with BD associates and having fun!

### The Programs Involved:

Many of BD's Leadership Development Programs participate in the Winter Externship Program; so no matter what your area of focus may be, there's a good chance you can find it here at BD. Each program offers activities and information tailored to the students within your area of interest, so you can get the most out of your experience. Below are the Leadership Development Programs involved in the Externship Program:

- Information Technology Leadership Program
- Manufacturing Development Program
- Strategic Sourcing Development Program
- Supply Chain Development Program

### What our previous Externs have said:

*"I really got to experience a day in the life of a BD employee and see what the path to life after college is really all about."* —Sheron, IT

*"I attended another Externship and the experience was nothing comparable to what BD offered."* —Bianca, IT

*"Having [the] CIO speak was enriching, because he provided his perspective about the company from the opposite end of the spectrum, from a senior management position"* —Timothy, Manufacturing

*"I thoroughly enjoyed the entire experience and I will be looking forward to applying to an internship"* —Anonymous, IT

### **To be considered for the Winter Externship Program, please apply through your school's job board.**

BD is a leading global medical technology company dedicated to improving people's health throughout the world.
