

WOMEN IN STEM PANEL
NOVEMBER 4TH, 3PM, VIA ZOOM
SPEAKER BIOS

Pema Kongpo, Product Manager, Sitetracker

Pema Kongpo is a Product Manager at Sitetracker. As a Product Manager, she works with a cross-functional team (engineering, design, marketing, sales) to build a product that solves the biggest challenges their customers have. Her background is a bit eclectic with experiences in software, education, and particle science. She has a double major in Biomedical Engineering and Sociology from Rutgers University. Outside of work, her hobbies include oil painting, making pottery, and playing with her pup.

Emma Roth, Project Engineer, Daikin Applied, '18

Emma is currently working at Daikin Applied as a Project Engineer, managing projects post sale. She graduated from Stevens in 2018 as a Mechanical Engineering major. She chose mechanical engineering because she liked that it offered a broad range of knowledge. A fun fact: she enjoys traveling, and in February she was in Barcelona.
