Available Opportunities Include:

ELECTRONICS ENGINEER: Electrical Design Engineer is responsible for the overall electronic control unit design. This is accomplished by choosing a design architecture that meets the performance, reliability, and cost targets and detailed design and analysis of the electronic control unit.

MECHANICAL PRODUCTION ENGINEER: Mechanical Production Engineer will develop, implement, and maintain methods, operation sequences, test equipment, and processes that continually ensure that equipment capacity will meet customer demand.

ASSEMBLY & TEST TECHNICIAN: A&T Technician primarily works in processing pneumatic, hydraulic, mechanical, and electromechanical assemblies for Space, Navy, and/or Aircraft applications. This role assists in the assembly and test of production hardware and their subassemblies, in accordance with schematics and other written and/or verbal specifications.

PROGRAM MANAGER: Program Manager leads multiple, concurrent development programs through proposal, funding, development, qualification and volume production. Program Managers coordinate and influence internal engineering, operations, business development, finance and contracts teams.

PRICING & PROPOSAL ANALYST: Pricing & Proposal Analyst will be responsible for cost estimating and other forms of pricing activities in support of various business proposals. This position will incorporate estimates from functional groups into pricing templates and prepare cost positions for negotiations.

We offer a quarterly bonus program along with a full range of top quality benefits and employee services including medical, prescription, dental, vision, life and disability income insurance programs, 401k retirement plans with company match, generous tuition aid program, paid vacation, sick and personal days, 11 holidays, summer hours, on-site credit union and ATM, and much more. We recognize and reward our employee's accomplishments.
